

Getac B300 Docking Station

Ergonomically designed with a smaller footprint

Created to protect the Getac B300 rugged laptop computer, steel and composite design offers a lightweight, yet rugged platform for long-term durability. The docking station is built for simple, one-handed docking. To dock the laptop, pull the side handle forward until the latch catches. To undock, unlock and push the key button until lever releases.

Port replication

Weight: 5.2 lbs (2.36 kg)

Dimensions (H x W x D): 4.9" (12.5cm) x 12.4" (31.5 cm) x 12.3" (31.2 cm)

Features

- Internal circuit board protects against dirt and dust.
- Internal power supply.
- Brass locating pins for precise computer placement.
- Floating docking connector for reliable docking connection.
- Interlocking mechanism protects against connector damage and prevents engagement until properly mounted.
- Forward facing ports for low mounting capability, minimal cable strain and minimal swivel resistance.
- Power switch with LED light and optional by-pass capability.
- Green LED indicates power to the docking station.
- USB 3.0 compliant.
- Gamber-Johnson mounting hole pattern.
- Accessories: LED Light Assembly (7160-0096), Screen Support (7160-0501).
- Certificates & Testing:**
 - RoHS, FCC, CE
 - Vibration/Shock Testing: MIL-STD 810G
 - Docking Mechanisms Tested: 10,000 cycles
 - SAE Standard J1455 Crash Test
- 3 year limited warranty. Optional 4 and 5 year extended warranty available.**
