

The **Smartest** Body Camera Technology

BodyWorn™ by Utility, Inc. is a future-proof solution that overcomes significant pitfalls that are found in competing police body-worn cameras. Utility developed this smart device to provide agencies with greater benefits than a manually operated camera. BodyWorn automatically records, based on policies when triggers are activated. Command centers and 911 dispatchers can send live messages to BodyWorn devices and view live streaming during critical moments. The video, audio and metadata automatically and securely uploads to cloud storage, eliminating the inconvenience of physically docking the device. BodyWorn is more powerful than ever now, with Smart Holster Sensors.

- Ⓢ **Automatic Policy-Based Recording**
- Ⓢ **Functional Fusion of Technology and Garment**
- Ⓢ **Secure Automatic Wireless Offload - CJIS Compliant**
- Ⓢ **Integration with the Rocket™ and Rocket IoT™**
- Ⓢ **Real-Time BOLO, Amber, and Silver Alerts**
- Ⓢ **Smart Holster Sensors**
- Ⓢ **Internal GPS and Accelerometer**
- Ⓢ **4G LTE Internet Connectivity**
- Ⓢ **Discrete Alerts for Backup**
- Ⓢ **Hi-Definition Video**
- Ⓢ **Officer Down Alerts**
- Ⓢ **Live Video Streaming**
- Ⓢ **Smart Video Redaction**
- Ⓢ **Wide Field of View**
- Ⓢ **Continuous Battery**

Product Features & Specifications

FEATURES:

- ⦿ Automatic Policy-Based Triggers
- ⦿ Immediate and Secure Evidence Offload
- ⦿ Real-Time Alerting
- ⦿ Officer Down Alerting
- ⦿ Live Video Streaming
- ⦿ Securely Mounted in Uniform

BODY CAMERA

Video

- 720p HD Video Resolution
- 30 Frames per Second
- Automatic High Dynamic Range
- Video Stored in Secure Slice Files
- Automatic Wireless Media Offload Process
- Automatic Secure Wipe after Upload
- Bright LED for Night Recording

Interactive

- Integrated LCD Monitor
- Automatic Officer Assignment
- Automatic Integration with In-Car Video Triggers and Metadata
- Voice/Touch Point Manual Operation Capable
- Covert Mode with Vibrating Notifications
- Bluetooth Communications
- Chain of Custody Validation for each minute of Automatic Video Offload
- Mobile Viewing Screen for Immediate Video Playback
- Accelerometer G-force Recording Triggers

Connectivity

- WiFi Connectivity
- Mass Alert Distribution - BOLO, Silver, Amber
- Cell Phone Replacement Alternative
- Cellular Connectivity Capable
- Receive Text Message Capable
- Voice Command Capable
- Audio Notification Capable

Other Features

- Live Streaming Video Capable
- GPS Position Reporting
- Time, Date, GPS Location in Metadata File
- Integration with Video Mapping Software

Environmental

- Operating temperature: -10° to 40° C
- Fully Rechargeable in just over an hour
- No Electromagnetic Interference

Multiple Mounting Options

Merging the BodyWorn™ technology with the officer's uniform keeps it streamlined and non-threatening. This ensures that the device is beyond the easy reach of criminals and is stable when recording, to provide the optimal audio and video of an incident.

EXTERNAL VEST CARRIER

DUTY SHIRT

SAFETY VEST

FOUL WEATHER JACKET

TACTICAL VEST

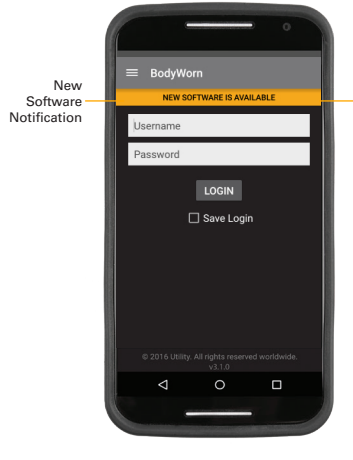

Available in a Variety of Brands, Color and Style Options

BodyWorn User Guide

Software Updates

Over-the-air updates are pushed out to each device and can be downloaded instantly.

Click the 'NEW SOFTWARE IS AVAILABLE' notification bar and follow the prompts to update the BodyWorn software.

Follow the prompts to complete the installation by clicking 'INSTALL'

BodyWorn Login

Login to your BodyWorn™ account with your assigned credentials or built-in NFC chip.

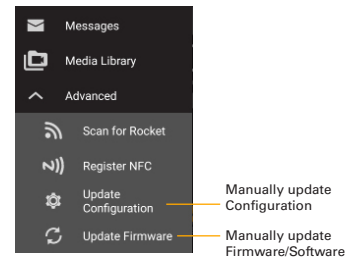

Home Screen

After logging in, you will be taken to the home screen.

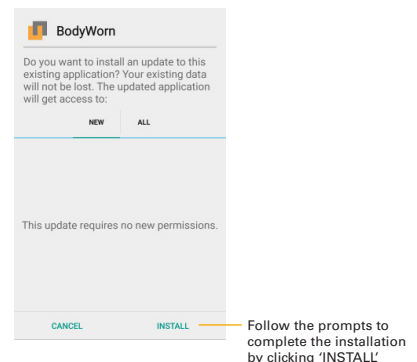

Software Updates

Use the Advanced menu in the Navigation Drawer to download configuration and firmware updates.

The Firmware can also be updated as described on the first page of this User Guide by clicking the notification at the top of the screen.

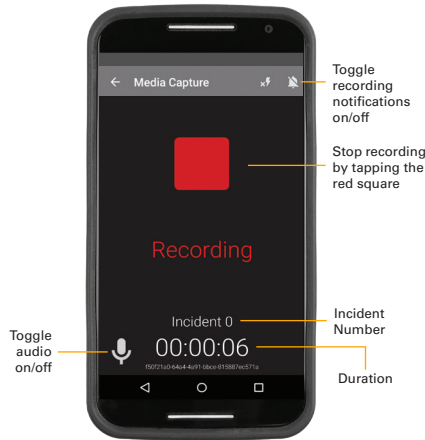

BodyWorn User Guide

Media Capture

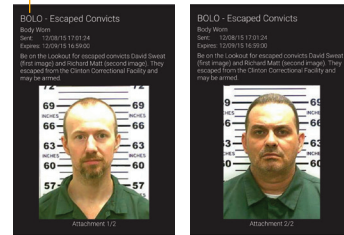

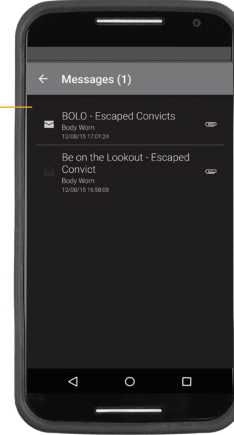

In Media Capture, you can record videos and take pictures. To access, follow these steps:

1. Click the 'Media Capture/ Media Library' icon
2. Click the 'video camera' icon

Messages

Receive messages like BOLO and Amber/Silver alerts, action zone entries, and 'recording' notifications by Supervisors and Central Dispatch.

Messages can include multiple attachments, written content and a subject line.

Photo Capture

Collect picture evidence to upload to secure storage by tapping the camera icon inside the Media Library tab.

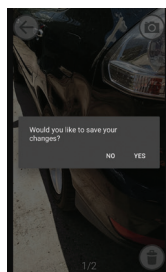

1. Click the 'Media Capture/ Media Library' icon
2. Click the 'camera' icon

Photo Capture

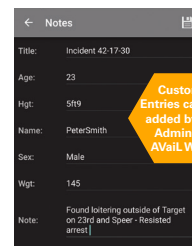

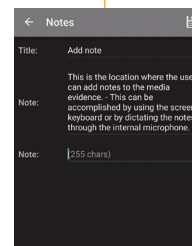

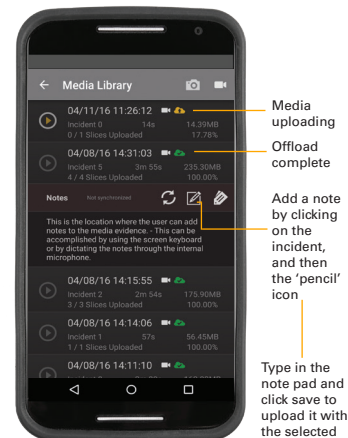

Photo Review

Save the Incident

Media Library/Notes

View uploading and offloaded media in the Media Library. This can be located in the Navigation Drawer or the Media Capture folder.

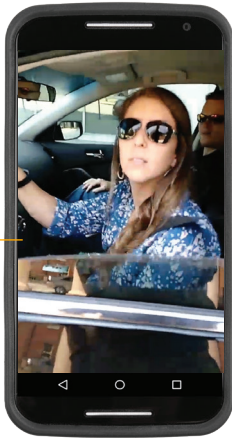

Custom Entries can be added by an Admin in AVail Web

BodyWorn User Guide

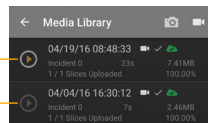

Media Playback

Video Evidence can be played back immediately on the BodyWorn device.

View your media evidence by clicking the incident's play button

Media is no longer viewable when the play button is gray due to storage limitation or expiration

Bluetooth/Status Check

BodyWorn can be activated through the connected Bluetooth device.

Status Check can be accessed by holding down the Utility icon on the home screen.

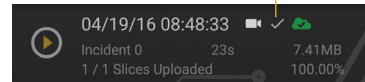

Adding Classifications

Choose the specific incident you wish to add a classification to within the Media Library. To access, follow these steps:

1. BodyWorn Click the 'Media Capture/ Media Library' icon
2. Click the incident you want to classify, and then the 'tag' icon

Once a classification is saved, there will be an check mark next to the description in the Media Library.

Smart Holster Sensor

When Seconds Mean Lives, Intelligence Matters

INTELLIGENT HOLSTER ACTIVATION AND ALERT SYSTEM

- ⦿ Automatic Activation of Body Cameras Upon Removal of Firearm
- ⦿ Real-Time Emergency Alerts to Dispatchers and Nearby Officers
- ⦿ Weeks of Battery Life on One Charge, USB Re-Chargeable
- ⦿ LED Status Indicator with Charge Status Alerts
- ⦿ Installation in Seconds on Most Major Holsters with No Modification Required

CAD Activation

Automate Recording Based on Dispatch Calls

**Merging CAD Data with
BodyWorn Cameras and
RocketIoT In-Car Video for
Enhanced Automation**

CAD INTEGRATION

- Ⓢ Bringing CAD information into the AVaiLWEB Cloud, such as: Call ID, Call Type, Priority of Call, Address and Dispatch information.
- Ⓢ As CAD calls come in, they are visible on the AVaiLWEB live map.

CAD ACTIVATION

- Ⓢ As CAD calls are assigned, the automation process can begin. When an officer is dispatched to an incident, their BodyWorn and RocketIoT video automatically starts recording and tags it with the CAD Incident.
- Ⓢ For High Priority Calls, an Action Zone with a pre-defined radius will automate, triggering recording and tagging of all video devices that enter the zone.

AUTO TAGGING & CLASSIFICATION

- Ⓢ For video not activated by a CAD call, the system can link to a CAD call based on start time, dispatch time, and officer ID.

**Allows the Officer to Focus on Their Job
When Sent on a Call for Service**

GET THE VIDEO

Guarantees video will be recorded when its needed most.

KEEP THE VIDEO

Alleviates the officer from having to manually classify the video after-the-fact, maintaining accuracy and safeguarding retention.

FIND THE VIDEO

Easily searchable in AVaiLWEB by classification, case #, call ID, report number, as well as related videos.

Smarter Digital Evidence Management

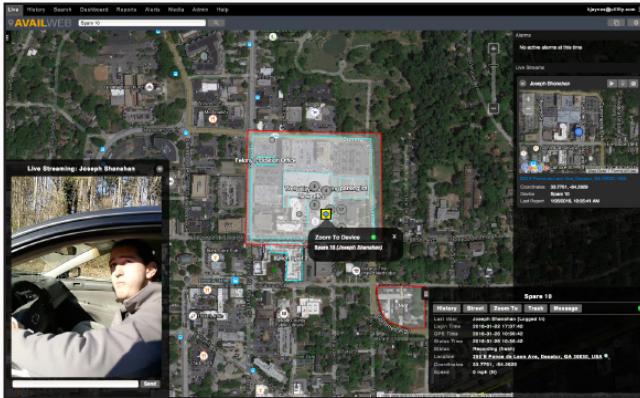

AVaiLWEB™ is a powerful web-browser solution that makes it easy yet secure to search, play, manage, redact, and share video and data with a secure chain of custody. The media interface allows multiple related video and audio feeds to be played simultaneously. AVaiLWEB also has live video streaming allowing dispatchers and supervisors to have complete situational awareness. It also provides an automatic real-time, map-based view of location and status of all mobile operations, including vehicles, personnel, and assets. AVaiLWEB provides Geofence alerts, live tracking, traffic and weather overlays, asset overlays and Street Views.

- Ⓢ All-In-One Web-Browser Platform
- Ⓢ Seamless Transfer of Video
- Ⓢ Secure & Unlimited Cloud Storage
- Ⓢ Geofence & Action Zone Activation
- Ⓢ Synchronized Video & Audio
- Ⓢ Video Redaction Tools
- Ⓢ Comprehensive Chain of Custody
- Ⓢ Customizable Configurations
- Ⓢ Multiple Videos from an Incident
- Ⓢ Live Map View
- Ⓢ Live Video Streaming
- Ⓢ Interactive Reporting
- Ⓢ Send Real-Time Alerts
- Ⓢ Ultimate Witness Portal

Smart Redaction

Automated Video Redaction

With SmartRedaction™, law enforcement agencies have the ability to redact video more effectively and efficiently when responding to Public Records Requests for video evidence, such as Freedom of Information Act (FOIA). The process of preparing videos for public dissemination, while maintaining privacy rights of those involved, can be time consuming and expensive. Not with Smart Redaction.

Smart Redaction identifies, tracks and redacts objects and people in a video, alleviating the need for large staff to work long hours to review and manually redact video. Smart Redaction is an industry-leading redaction tool, built for BodyWorn™ and Rocket IoT™ in-car video, that protects the privacy of victims, innocent bystanders, minors and undercover officers, while saving time and money for the agency using it.
