

SMART HOLSTER SENSOR

Intelligent Holster Activation and Alert System

WHEN SECONDS MEANS LIVES, INTELLIGENCE MATTERS

EOS by Utility, Inc. is a future-proof solution that overcomes significant pitfalls that are found in competing police body worn cameras. Utility developed this smart device to provide agencies with greater benefits than a manually operated camera.

EOS automatically records, based on policies when triggers are activated. Command centers and 911 dispatchers can send live messages to EOS devices and view live stream video during critical moments.

The video, audio and metadata automatically and securely uploads to CJIS compliant cloud storage, eliminating the inconvenience of physically docking the device.

- Real-Time Emergency Alerts to Dispatchers
- Real-Time Emergency Alerts to Nearby Officers
- Weeks of Battery Life on One Charge, USB Re-Chargeable
- LED Status Indicator with Charge Status Alerts
- Installation in Seconds on Most Major Holsters, No Holster Modification Needed
- Activation of Body Cameras

PRODUCT FEATURES AND SPECIFICATIONS

VIDEO

- 720p, 1080p HD Video Resolution
- 30 Frames per Second
- Automatic High Dynamic Range
- Video Stored in Secure Slice Files
- Automatic Wireless Media Offload Process
- Automatic Secure Wipe after Upload
- Low Light Video Rating of 0.1 lux

CONNECTIVITY

- WiFi Connectivity 802.11 b/g/n
- Mass Alert Distribution - BOLO, Silver, Amber
- Cellular Connectivity Capable 4G LTE
- Receive Text Message Capable
- Audio Notification Capable
- Full-Shift Battery Life

INTERACTIVE

- Integrated LCD Monitor
- Automatic Integration with In-Car Video Triggers and Metadata
- Covert Mode with Vibrating Notifications
- Bluetooth Communications
- Chain of Custody Validation for each minute of Automatic Video Offload
- Mobile Viewing Screen for Immediate Video Playback
- Accelerometer G-force Recording Triggers

OTHER FEATURES

- Live Streaming Video Capable
- GPS Position Reporting
- Time, Date, GPS Location in Metadata File
- Integration with Video Mapping Software
- Programmable Pre-Record Option, 5 - 120 seconds

ENVIRONMENTAL

- Operating temperature: -10° to 55° C
- Fully Rechargeable in just over 2 hours
- No Electromagnetic Interference

FEATURES:

Automatic Policy-Based Triggers
Immediate and Secure Evidence Offload

Real-Time Alerting
Patented Uniform Integrated Mounting System

Live Video Streaming
Officer Down Alerting

THE SMARTEST BODY CAMERA TECHNOLOGY

EOS by Utility, Inc. is a future-proof solution that overcomes significant pitfalls that are found in competing police bodyworn cameras.

Utility developed this smart device to provide agencies with greater benefits than a manually operated camera. EOS automatically records, based on policies when triggers are activated.

Command centers and 911 dispatchers can send live messages to EOS devices and vlive stream video during critical moments.

The video, audio and metadata automatically and securely uploads to CJIS compliant cloud, eliminating the inconvenience of physically docking the device.

- Automatic Policy-Based Recording
- Functional Fusion of Technology and Garment
- Secure Automatic Wireless Offload - CJIS Compliant
- Integration with the Rocket™
- Auto-Classification of Video
- Real-Time BOLO, Amber, and Silver Alerts
- Internal GPS and Accelerometer
- 4G LTE Internet Connectivity
- High Definition Video/Audio
- Officer Down Alerts
- Live Video Streaming
- Smart Video Redaction
- Holster Sensor Activation
- CAD Activation
